PROFESSIONAL SUMMARY

Azure-focused Cloud professional with strong fundamentals in cloud infrastructure, networking, and virtualization. Hands-on experience in deploying and managing Azure services including Virtual Machines, VNets, and Storage solutions, along with working knowledge of AWS cloud services. Currently preparing for AZ-104 certification and seeking an entry-level role to contribute to cloud infrastructure management.

TECHNICAL SKILLS

Microsoft Azure

- Compute**:** Virtual Machines (Windows/Linux), VM Scale Sets
- Networking**:** Virtual Network (VNet), Subnets, NSG, Azure Bastion, VNet Peering
- Load Balancing**:** Azure Load Balancer, Application Gateway, Traffic Manager
- Storage**:** Blob Storage, File Shares, Managed Disks
- Security**:** Azure Key Vault, RBAC, SSH Authentication
- Web & App Hosting**:** Azure App Services, HTTPS Configuration
- Infrastructure**:** ARM Templates (JSON)
- Containers**:** Docker (Basics)
- Backup**:** Azure Backup & Recovery

Amazon Web Services:

- Compute: EC2, Auto Scaling, AMI, Elastic Beanstalk
- Networking: VPC, Subnets, Route Tables, Internet Gateway, NAT, Bastion Host
- Load Balancing: Elastic Load Balancer (ELB), Target Groups
- Storage: S3, EBS, EFS
- Databases: RDS, DynamoDB
- Security: IAM, KMS, Security Groups, NACL, AWS Organizations
- Monitoring: CloudWatch, CloudTrail
- DNS & CDN: Route 53, CloudFront
- Automation: CloudFormation, Lambda (Basics), EventBridge
- Messaging: SQS, SNS
- Backup: AWS Backup

Networking

- Strong fundamentals in IP addressing, subnetting, routing, switching, and NAT
- Hands-on understanding of LAN/WAN concepts, VLANs, and basic network troubleshooting
- Cloud networking knowledge including VPC/VNet design, subnets, route tables, Internet Gateway, and NAT Gateway
- Familiar with network security basics such as Security Groups and Network Security Groups (NSG)

PROJECTS

1. Secure Multi-Tier Web Application Deployment (Azure)

• Designed a 3-tier architecture using Virtual Machines, VNet, and Subnets
• Configured Network Security Groups (NSG) to control traffic between tiers
• Implemented Azure Bastion for secure access to private VMs
• Deployed web application with HTTPS and load balancing using Application Gateway

2. Highly Available Web Application on AWS

• Deployed application using EC2 instances with Auto Scaling Group
• Configured Elastic Load Balancer (ELB) for traffic distribution
• Designed VPC with public/private subnets, Internet Gateway, and NAT Gateway
• Integrated Route 53 for DNS and CloudFront for content delivery

3. Hybrid Cloud Networking Architecture (Azure + AWS)

• Designed secure network architecture across Azure VNet and AWS VPC
• Implemented subnetting, routing, and controlled access using NSG & Security Groups
• Configured Bastion Host for secure remote access
• Applied network troubleshooting and connectivity validation

4. Automated Infrastructure Deployment (AWS & Azure)

• Automated resource provisioning using AWS CloudFormation and Azure ARM Templates
• Deployed VMs, networking components, and storage using Infrastructure as Code
• Reduced manual configuration and improved deployment consistency

EDUCATION

Yenepoya University, Mangalore
Bachelor of Computer Applications (BCA) – Specialization in Big Data Analytics, Cyber Security & Cloud Computing
completed: 2022 – 2025
SRM Institute of Science and Technology, Chennai
Master of Computer Applications (MCA) – Distance Education Ongoing: 2025-2027

LANGUAGES

- English – Professional Working Proficiency
- Malayalam – Native
- Hindi – Professional Working Proficiency
